

OVERVIEW OF STUDENT PROJECT TEAMS

● Autonomous Robotic Vehicle Project (ARVP)

A multidisciplinary group providing students the opportunity to design, build, and test autonomous underwater vehicles. These vehicles are deployed annually at the international RoboSub Competition held in California.

● EcoCar

A student-run project team that designs and builds ultra-efficient hydrogen fuel cell-powered vehicles to compete in the annual Shell Eco-Marathon.

● UAlberta Formula Racing

A student-run team that designs, builds, tests, and competes with a Formula-style racecar at SAE's international collegiate competition. Open to all disciplines, it fosters skills in engineering, budgeting, leadership, and collaboration, uniting students through innovation, teamwork, and a passion for motorsport.

● AlbertaSat

A student-led initiative that designs, builds, and operates CubeSat satellites. Having already launched two - one measuring Earth's magnetic field and another monitoring wildfires - the team is now developing a satellite to collect detailed image data on snow and glaciers.

● Student Team for Alberta Rocketry Research

A student project group that competes in intercollegiate rocketry competitions. Members design, test, and construct their own airframes and avionics systems and develop liquid rocket engines through the team's propulsion program.

● Engineers for a Sustainable World

An engineering student project group working on a variety of sustainability-focused technologies and projects that make a direct impact in and around the university community.

● Mechanical Engineering Club (MEC E Club)

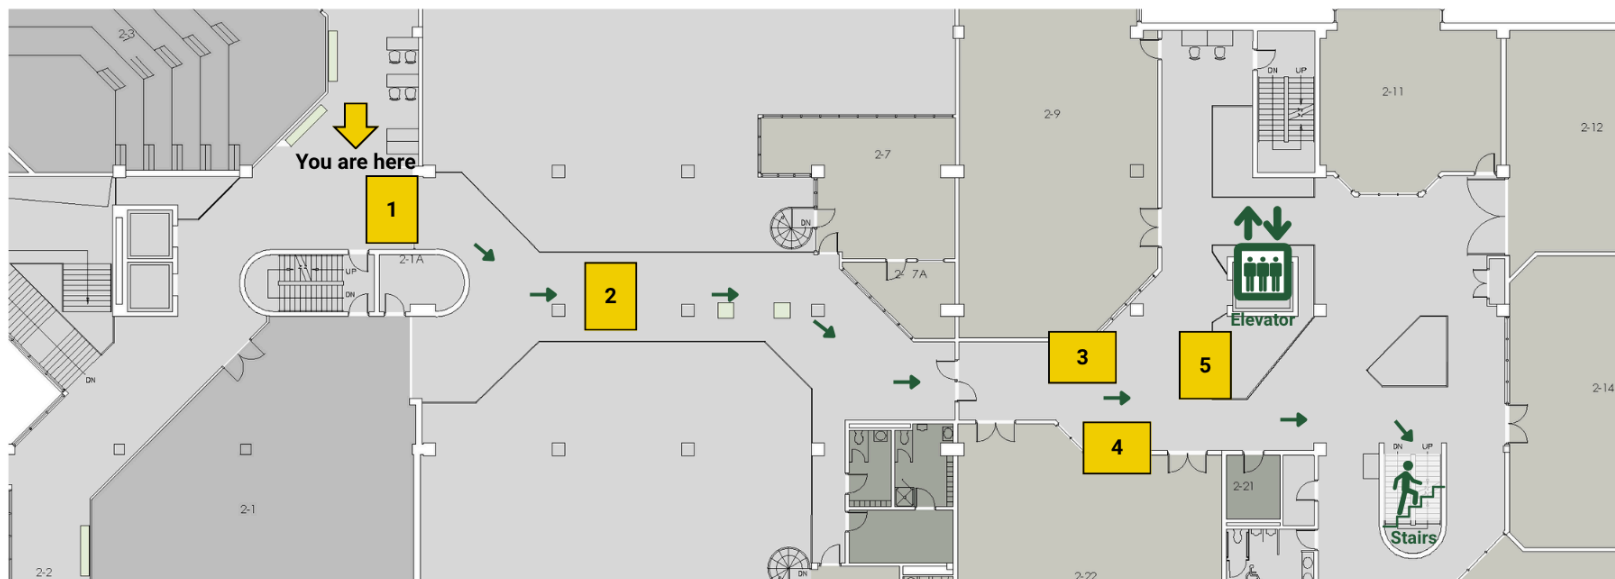

A student-run community for Mechanical Engineering students, hosting social and industry events, intramural teams, and offering on-campus services like snacks and printing.

TOUR MAP

OPEN HOUSE 2025
DEPARTMENT OF MECHANICAL
ENGINEERING

- 1** Start – West Entry
- 2** Undergraduate Design Courses
- 3** Autonomous Robotic Vehicle Project (ARVP)
- 4** EcoCar
- 5** UAlberta Formula Racing

Second Floor
Mechanical Engineering

- 6** Room 3-26: MEC E 403 "Mechanical Engineering Laboratory II"
- 7** Dean's Research Award DRA and Capstone Projects
- 8** AlbertaSat
- 9** Room 3-1: MEC E Program Presentation
- 10** Student Team for Alberta Rocketry Research
- 11** Engineers for a Sustainable World
- 12** MEC E Club
- 13** Room 3-10: MEC E 301 "Mechanical Engineering Laboratory I" Demos

Third Floor
Mechanical Engineering
